

# Ny-Chem<sup>®</sup> KYNAR<sup>®</sup> PVDF TUBING

**Ny-Chem** is a flexible, high grade Kynar PVDF (Polyvinylidene Fluoride) Tubing that is one of the purist of all commercial resins, making it ideal for applications where compliance to most agency regulations such as FDA, USDA, USP and NSF is required. **Ny-Chem** is also one of the toughest tubing materials and offers extremely good chemical resistance. As long as high heat is not a consideration, **Ny-Chem** can be used in applications where PTFE was once considered the only option at a fraction of the cost. **Ny-Chem** can also be coiled into self-storing air hoses. The color is natural.

## Fractional Inch size Tube Ordering Information

Tube OD	Tube ID	Part Number	Tubing Length Code
1/4"	.170	K0840-	B,C,G,J
3/8"	.275	K1240-	B,C,F,G
1/2"	3/8"	K1640-	B,C,F

## METRIC Millimeter size Tube Ordering Information

Tube OD	Tube ID	Part Number	Tubing Length Code
6 mm	4 mm	K0630-	B,C,G,J
8 mm	6 mm	K0830-	B,C,F,G

Must assign Length Code to complete the Part Number!

### LENGTH CODES:

B = 50 Feet  
C = 100 Feet  
F = 250 Feet  
G = 500 Feet

### Special Property Traits:

- Use where Highly Pure Chemically Inert Material Is Required
- Tasteless & Odorless
- Meets NSF Standard 61
- Meets UL 94 V-O Flame Retardant Requirements
- Complies With USDA, FDA & Sanitary Standards For PVDF
- Low Permeability, Low Outgassing

### Applications:

- Food and Beverage Services
- Medical, Pharmaceutical
- High Purity Semiconductor Process Applications

### Ny-Chem<sup>®</sup> PVDF is resistant to:

- Oxidants, Radiation, Ultraviolet Light, Acids
- Alcohol, Aromatics, Mild Bases, Chloride & Fungus

### Technical Specifications:

- Temperature Range: -40 to +250°F
- Working Pressure: 200PSI @ 68°F
- Color: Natural (for purity)

## Precision Coil Ordering Information

This page describes our standard offerings. We can make any size, length or coil counts. Consult the factory for special requirements.

Tube OD "A" (in)	Tube ID "D" (in)	Part Number	Total Length (in)	Length w/o Tails (in)	Number of Coils	Coil OD "B" (in)	Compact "C" (in)
1/4"	.170"	K0840-036	36	24	6	1 5/8"	1 7/8"
1/4"	.170"	K0840-060	60	48	12	1 5/8"	3 3/4"
1/4"	.170"	K0840-084	84	72	18	1 5/8"	5 5/8"

# ***Thermoplastic Fittings and Valves***

## **TrueSeal™**

- FDA Compliant
- NSF-51 Listed
- Acetal Fittings meet NSF-61
- All Plastic Body Designs

## **Polypropylene Ball Valves**

- FDA Compliant
- NSF-51 Listed
- Bi-directional
- Corrosion Resistant

## **Fast & Tite®**

- FDA Compliant
- NSF-51 Listed
- Stainless Steel Grab Ring
- O-ring Seal

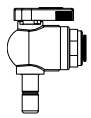

## **Par-Barb®**

- FDA Compliant
- NSF-51 Listed
- High Strength,  
Chemically Inert

# TrueSeal™ Thermoplastic Push-In Fittings

The patented\* TrueSeal™ push-to-connect thermoplastic fittings are light weight, Field Attachable, and connect to plastic tubing without the use of tools.

D

## Features

- All components in TrueSeal™ fittings are manufactured from FDA compliant materials and are NSF-51 listed for contact with food.
- Gray acetal TrueSeal™ fittings meet NSF-61 requirements for drinking water (potable water) system components.
- All-plastic body designs offer reduced weight, eliminate rust, corrosion, and system contamination in applications where metal components cannot be tolerated.
- Collets are offered in either a patented all-plastic design for use with flexible tubing or with a metal grip edge made from 300 series stainless steel for use on all tubing including copper.
- Extra deep tube seat in fitting body provides support to reduce side-load leakage.
- Elastomer o-ring seal provides positive compression on tubing O.D. in vacuum or pressure applications.
- Removable collet design permits o-ring replacement in the field. Collets are available in colors for easy color coding of systems.
- Tube stem adapters provide a wide range of tube-to-port jump size potential and allow elbows and tees to swivel for positive tube routing alignment. Connections made with metal gripper collets, may require tube stems to be replaced upon reconnection.

## Applications

TrueSeal™ fittings find wide acceptance in water conditioning, filtration, and reverse osmosis industries and on water, soft drink, beer, wine, and condiment dispensing equipment. Industrial applications range from vacuum to low-pressure hydraulic and pneumatic systems on robotics, air logic, packaging/filling equipment, and conveyors. Ink and dye transfer, lubrication and cooling lines on presses, machine tools, ion implanting devices—all rely on TrueSeal™.

## Standard Materials

Material	Fitting Color	O-Ring
Acetal	Gray	EPDM
Polypropylene	White	EPDM
Kynar®	Natural	Viton

Black nitrile o-rings and colored collets in black, white, red, blue, green, yellow and orange are also available. Consult Division. KYNAR® is a registered trademark of Atochem North America, Inc. \*U.S. Patent 5,584,513

Note: Provide adequate fail-safe mechanisms such as leakage detection sensors, automatic shut-off controls or other industry and code appropriate fail-safe devices in the design of your water-handling appliance to protect against personal injury and property damage. Plastic fittings containing an o-ring have a finite life depending on the environment, media and severity of the application. Frequent inspections and replacement of the fitting when anomalies are found is recommended.

## How to Order

A 4 MC 4 - MG - V

## Working Pressure

TrueSeal™ fittings are rated for the pressures listed below or at 1/4 (one-fourth) of the rated burst pressure of the tubing being used (whichever is less).

Fitting Size	Acetal	Polypropylene	Kynar®
1/4"	300	150	300
5/16"	300		
3/8"	300	150	300
1/2"	250	150	
Temp. Range	-20°F (-29°C) to +180°F (85°C)	0°F (-18°C) to +225°F (110°C)	0°F (-18°C) to +275°F (135°C)

- These pressure ratings are based on tests conducted with Series NR tubing at 73°F.
- Actual working pressures will be lower at elevated temperatures. Consult division.
- Meets pressure integrity tests of NSF-53 and NSF-58

## Tubing

Parker TrueSeal™ fittings with all plastic collets can be used with the following tubing materials: polyethylene, polypropylene, nylon, vinyl, fluoropolymer, and polyurethane (3/8" and 1/2" polyurethane and all sizes of vinyl should use tube supports). TrueSeal™ fittings with metal gripper collets can be used with tubing listed above and soft copper tubing. For stainless steel or glass tubing or all other metal tubing, consult factory.

Tube Sizes	O.D. Tolerance	Insertion Depth
5/32"	±005"	9/16"
1/4"	±005"	11/16"
5/16"	±005"	13/16"
3/8"	±005"	3/4"
1/2"	±005"	7/8"

## Assembly Instructions

1. Cut tubing square and clean. (Use a Parker plastic tube cutter, Part No. PTC.)
2. Mark from end of tube the length of insertion (see table above).
3. Push tube into the fitting until it bottoms out.
4. To remove, depress collet and pull tubing out.
5. Use TrueSealant™ (Part No. PTS) on threads.

**Parker TrueSeal™ Cartridge Inserts:**

Allow you to machine or mold a tube connection into your equipment or components. By using cartridge inserts, you will reduce your material and assembly costs, reduce potential leak paths, and give your equipment a new, clean profile by eliminating the need for threaded connections. TSC Cartridge Inserts consist of 1 o-ring, 1 cartridge, and 1 collet.

\*Cartridge inserts are rated at 300 psi in ports dimensioned as above and having Noryl as the receiving material. Other materials may have different ratings and require different port dimensions. Consult the Brass Products Division when using polypropylene, unfilled polypropylene, ABS or Nylon.

**Assembly Instructions:**

- Step 1**—Machine or mold the receiving orifice as per the above dimensions.
- Step 2**—Place the cartridge insert squarely onto the prepared port opening making sure that the barbs of the cartridge are going into the hole and the lettering on the face of the cartridge is visible.
- Step 3**—Using a rubber mallet or press, insert the cartridge into the first gland orifice until its face is flush with the top surface of the port.
- Step 4**—Insert the o-ring into the cartridge and seat it evenly into the second gland orifice.
- Step 5**—Insert the collet into the cartridge opening.
- Step 6**—Insert tubing.

NORYL® is a registered trademark of the General Electric Co.

# TrueSeal Check Valves

Push-to-Connect check valves that ensures protection against reversal of flow. The valves have an arrow molded into the body to indicate the direction of flow. Valves are designed for connection with either thermoplastic or soft metal tubing and are intended for use with liquids only.

**Materials of Construction**

**Body:** Acetal

**O-ring:** EPDM

**Metal Grip Edge:** 300 Stainless

**Working Pressure**

Up to 150 PSI depending on tubing being used

**Temperature Range**

+34°F (1° C) to +150°F (65°C)

**Cracking Pressure**

1/3 PSI

**VC – Check Valve**

PART NO.	TUBE SIZE	L	O.D.

A5VC5-MG	5/16	2.10	.70
A6VC6-MG	3/8	2.15	.80

# Polypropylene Ball Valves

For proven leak-free performance, specify **Polypropylene Ball Valves**. Their corrosion-resistant, all-plastic design makes them ideal for water filtration units, coffee and beverage machines and a wide variety of other fluid applications. Polypropylene material meets all FDA and NSF-51 requirements for food contact.

**Features/Benefits:**

- Precision molded, all-plastic design is leak free and corrosion resistant.
- Polypropylene material offers a wider chemical acceptance range, as well as a wide temperature range.
- Bi-directional flow maximizes productivity.
- Full flow design reduces pressure drop across the valve.
- Special o-ring seal ensures a reliable leak-tight connection.
- TrueSeal™ connection reduces potential leaks.

**Specifications:**

- Temperature range: 0°F to 225°F (-18°C to 107°C).
- O-ring seal material: Nitrile.
- NSF-51 listed.
- Pressure rated to 150 PSI with a 600 PSI burst pressure. Actual working pressures will be lower at elevated temperatures

**Advantages:**

- Reduce costs—Built-in TrueSeal™ connection eliminates the need for a secondary fitting.
- Save space—Low-profile design allows for easy assembly and access where space is at a premium.

**Assembly Instructions:**

1. Inspect the mating threads for debris or damage. Remove any old fluoropolymer tape or sealant on previously used threads. If threads are damaged, replace with new adapter before proceeding.
2. Apply 2 to 3 wraps of fluoropolymer tape, Parker TrueSealant™ or an NSF/FDA approved silicon sealant. Do not use Plumbers Putty or Pipe Dope. These chemically react with plastic materials and could cause a failure.
3. Align ball valve to mating thread to ensure cross threading does not occur.
4. Screw ball valve onto mating thread 3 to 5 turns. This should be sufficient to properly seal the threads.
5. Pressurize system and check for leaks.

## Cold Water Supply Valve (Patent No. 6,213,149)

Parker's water supply valve is intended for use with Point Of Use water appliances requiring a cold water supply such as POU faucets, instant hot water faucets, reverse osmosis systems and water filtration systems. The Parker TrueSeal™ Cold Water Supply Valve is designed for temporary cold water shut-off to a POU appliance to change filters, tanks or when servicing the appliance — all while maintaining full water flow to the sink or water basin above. When the POU system is removed from service, the Parker TrueSeal™ Cold Water Supply Valve is to be removed also.

TrueSeal™ Cold Water Supply Valves are for cold water service at temperatures above freezing to 125°F ambient. Not for use in hot water service applications.

### Features/Benefits:

- Fast, easy installation.
- No pierced lines or saddle hookups.
- Optimum flow to the faucet - full flow porting.
- No need to pierce the supply line.
- Connects 3/8" OD tubing directly to valve.
- 1/2" NPT connections available.
- Excellent resistance to chlorine and other chemicals.
- Integrated handle for easy on/off operation.
- Visual indicator shows open/closed position.

### Specifications:

- NSF Standard 51 listed.
- Pressure rating: 150 PSI with a 600 PSI burst pressure.
- Design factor: 4:1
- O-ring seal material: EPDM.
- Meets the pressure integrity test of NSF-53 and NSF-58.

### Applications:

- Reverse osmosis systems.
- Under sink filtration systems.
- POU faucets.
- Water supply valves are intended for cold water service at temperatures from above freezing to 125°F ambient.
- NOT for use in hot water service applications.

## TrueSeal™ Cold Water Supply Valve Assembly Instructions

### For Installation with 3/8" Plastic Tubing:

1. Shut off water at the chrome or brass valve.
2. Disconnect existing tube assembly.
3. Cut out a 1-3/8" (35 mm) section near the center of the existing tubing. Cut the tube squarely and remove any burrs.
4. Place an insertion depth mark 3/4" (19 mm) from the end of each cut on the tubing to be reused. Refer to "TrueSeal Assembly Instructions," Steps 2 and 3, for tubing assembly (reverse side).
5. Reconnect tube assembly with new valve.
6. Make sure new valve is closed before opening water valve. Open valve in Step 1 and check for leaks.
7. Insert 3/8" tubing from water appliance into side port.
8. Open new valve by turning pointer to large end of flow indicator.

### For Installation with Flexible Hose:

1. Shut off water at the chrome or brass valve.
2. Disconnect one end of existing hose assembly.
3. Place the appropriate adapters on the chrome or brass valve and the hose end.
4. Tighten adapter on chrome or brass valve finger tight plus 1/2 turn. Do not over tighten.
5. Push tube portion of adapters into top and bottom of valve until bottomed out. Hose should not be kinked. A longer hose assembly might be required if a gently loop cannot be made.
6. Make sure new valve is closed before opening water valve. Pointer will be at the small end of triangle flow indicator. Open valve in Step 1 and check for leaks.
7. Insert 3/8" tubing from water appliance into side port.
8. Open new valve by turning pointer to large end of flow indicator.

## PTS - Pipe Thread Sealant

NSF-51 listed silicone.

## AQRT - Quick Release Tool

Makes disconnection of tube adapters and tubing a breeze.

## Fast & Tite® Thermoplastic Fittings

Fast & Tite® fittings are the most complete line of plastic fittings for thermoplastic tubing in the industry.

Use Fast & Tite® fittings with Parker Parflex tubing or other plastic, glass or metal tubing for low pressure or vacuum lines up to the pressure limits shown below. When using clear vinyl tubing or urethane tubing, it is necessary to use a TS tube support. A tube support can be used with any tubing for maximum holding power where tensiling, vibration or pressure spikes may occur.

Fast & Tite® fittings meet FDA and NSF-51 requirements for food contact.

### Working Pressures for Fast & Tite® Fittings

Air-Oil-Water Pressure in PSI			
Tube O. D., in.	Up to 75°F	76° to 125°F	126° to 175°F
1/4	300	300	300
5/16	300	300	300
3/8	250	250	150
1/2	200	200	150
5/8	150	100	50

Ratings are based on use with copper tubing, and in all cases represent the maximum recommended working pressure of the fitting only. Working pressures (vs. temperatures) of other types of tubing may limit the tube and fitting assembly to pressures lower than shown above. Consult factory for recommendations on applications other than shown above.

### Temperature Range:

Black/White Polypropylene: 0°F (-18°C) to +212°F (+100°C) White Nylon: -40°F (-40°C) to +200°F (+93°C)

D

Fast & Tite® thermoplastic tube fittings from Parker will prove to be the answer to your tubing connector needs. Patented Fast & Tite® fittings install in seconds without tools and provide a tight, sure, leak proof seal without clamps or adjustments. A unique 302 stainless steel grab ring for tube retention, coupled with a Nitrile O-Ring for positive seal, assures good tube connection with only hand tight assembly. A plastic grab ring is also available upon special request. Vibration or tube movement will not break the seal and cause leakage. Preassembled in either highly inert polypropylene, or strong, durable nylon, Fast & Tite® fittings are the answer to full flow thermoplastic tubing system requirements.

When necessary, Fast & Tite® fittings can be disassembled by hand for fast system drainage. Fittings are completely Field Attachable. Parts are easily replaced. O-Rings are standard size and universally available. (For applications requiring other than Nitrile O-Rings, consult your Fast & Tite® distributor.)

### Fast Assembly

#### Step 1.

Cut the tube squarely and remove any burrs.

#### Step 2.

Mark from end of tube the length of insertion. If using a tube support, insert fully into tube and then mark from end of tube support length of insertion. (See table below)

Tube O.D. (in.)	Insertion Length with Tube Support (in.)	Insertion Length without Tube Support (in.)
1/4	5/8	9/16
5/16	5/8	9/16
3/8	13/16	3/4
1/2	7/8	13/16
5/8	1	15/16

#### Step 3.

Loosen nut on fitting until three threads are visible. Fittings for glass tubes must be disassembled and the grab ring removed. If the fitting has been disassembled the components are to be placed in the following order: fitting body, o-ring, spacer, grab ring and nut. Assemble the nut until three threads are showing on the body before inserting tube.

#### Step 4.

Moisten end of the tube with water. Push the tube Straight into fitting until it bottoms on the fitting's shoulder. Tighten nut by hand. Additional tightening should not be necessary, but 1/4 additional turn may be added if desired. Do not overtighten nut as the threads will strip and the fitting will not function properly. A proper assembly will not show the insertion mark extending beyond the nut. If the insertion mark is visible, then steps 1 thru 4 must be repeated.

Note: Provide adequate fail-safe mechanisms such as leakage detection sensors, automatic shut-off controls or other industry and code appropriate fail-safe devices in the design of your water-handling appliance to protect against personal injury and property damage. Plastic fittings containing an o-ring have a finite life depending on the environment, media and severity of the application. Frequent inspections and replacement of the fitting when anomalies are found is recommended.

## Par-Barb® Thermoplastic Fittings

Par-Barb® fittings are precision injection molded from high-strength, chemically inert, thermoplastic materials.

The specially engineered four-barb design generates the maximum gripping and sealing power when combined with a hose clamp. The unique barb design requires the tube or hose to expand slightly to accept the fitting, providing a positive seal on the barbs.

Par-Barb® fittings are widely used with Parflex clear vinyl tubing, urethane tubing and a variety of rubber tubing and hose. Par-Barb® fittings meet FDA and NSF-51 specifications for food contact.

Par-Barb® is recommended in medical, pollution control, food and beverage applications. Other uses include irrigation, instrumentation, reverse osmosis and deionized water systems.

### Temperature range:

Black Polyethylene: -65°F (-54°C) to +190°F (+88°C.)

White Nylon: -40°F (-40°C) to +200°F (+93°C.)

### Working pressures:

Par-Barb® fittings are generally used in systems where pressures do not exceed 125 PSI. When used in excess of 125 PSI, Par-Barb® fittings, in all sizes, should be tested by the customer in his particular application. Operating pressures of Par-Barb® fittings are governed by ambient and fluid temperatures, type of fluid conveyed, hose or tubing used, clamping mechanism employed and conditions of mechanical abuse.

### How to order Par-Barb® fittings:
